

AlphaLUXX Mobile

A light and stand system developed by GIFAS: practical and deployable in many areas.

Stipulation:	Simple assembly on tripods and floor stands
Solution:	AlphaLUXX with floor stand and tripod
Article:	169048
Areas of application:	For the military, fire departments, civil protection etc.

Starting situation

Our high-performance AlphaLUXX floodlight comes with a mounting bracket as standard. To optimise various application possibilities, GIFAS has developed a type of stand that can be quickly and easily attached to a tripod thanks to an attachment joint at the bottom of the stand. This also facilitates a second use, for which it can simply be placed on the ground.

The angle of the floodlight can be adjusted laterally using two star grips. In order to avoid tripping hazards, the cable is rolled up onto the integrated coiler.

Customer benefits

- Excellent and bright illumination
- Quick tripod installation
- Practical stand for floor placement

The AlphaLUXX Mobil is robust and weatherresistant

Simply place the floor stand-mounted AlphaLUXX Mobil in the grass
