

Power column Steinach harbour

In every weather, the robust power column will ensure safe power connection.

Customer/installation engineer:	Steinach harbour commission/ETAVIS Arbon
Requirement:	complete electrical installation/renovation of socket spaces
Solution:	Hard rubber distributor on standpipe screwed to the pier
Item no.:	Hard rubber distributor 7400 light grey (Item no. 165918)
Quantity:	34
Equipment:	4× CEE 16A individually protected via RCBos
Areas of application:	Harbour dock

Starting situation

The electrical installation, including the supply line, had gotten outdated and no longer met contemporary regulations. The functionality of the RCD was no longer ensured and, as a result, safety could no longer be completely guaranteed.

The docks have been equipped with 34 new power columns and therefore once again meet current regulations.

Customer benefits

- massive, weather-resistant design
- tailor-made equipment
- new installation that meets current regulations
- for each distributor, 4 individually protected recessed CEE 16A
- the blue LED, serves as a discreet orientation light
