

StreamLED 2 illuminates bus stops in Interlaken

Energy-saving and efficient illumination

Customer / installation engineer:	Industrielle Betriebe Interlaken
Requirement:	Illumination of the new bus stops
Solution:	StreamLED 2, 35W, 5'000K
Article:	860663
Quantity:	2
Areas of application:	Tunnel, access gallery, power station, sewage treatment plants, exterior and interior areas of the water reservoir

Starting situation

In the course of refurbishment work at a bus stop in Interlaken, our customer was looking for lighting which is vandal-proof and easy to maintain. These requirements are met by the StreamLED 2. The luminaire is easy to install, impact-resistant and fits in perfectly with the metal structure. The stop is now uniformly illuminated and provides the waiting passengers with increased safety.

Customer benefits

- high efficiency and uniformity of the light
- quick and easy installation with brackets A4
- plug-in supply, for wiring through
- maintenance-friendly
- impact resistant
